

QUALITY ASSURANCE POLICY

BS EN ISO 9001: 2015

The policy of Target Fire Protection is to provide the highest levels of service and quality and to provide our customers with a personal and responsive approach to their needs.

Target Fire Protection is totally committed to setting and achieving quality standards that are capable of meeting or exceeding, in all respects, the specified requirements and reasonable expectations of our customers for high quality, reliable, equipment and service.

To this end we comply with all of the relevant Standards and are registered with BAFE™.

To achieve these objectives, together with our performance objectives, everyone's involvement and commitment is vital in adhering to the system adopted and in fully appreciating their quality responsibilities.

It is essential that every member of this Company is aware of our commitment to Quality Assurance, for which a Systems Manual and Procedures have been prepared.

By reviewing and developing the Company's procedures we will aim for continual improvement of the Quality System.

All our staff are required to comply with these documented procedures and are invited to contribute to this development at any time.

ENVIRONMENTAL POLICY

BS EN ISO 14001: 2015

The Environmental goal of Target Fire Protection Limited is to achieve and maintain continual improvement in the control and prevention of pollution by assessing the environmental impact of its activities, products and, where applicable, services.

The Organisation will commit itself to complying with all relevant environmental legislation and regulations, along with any industry specific or other requirements to which the organisation may from time to time subscribe.

The company has therefore devised objectives and targets, the current focus of which is to continually improve the system and prevent pollution against rationales as detailed throughout this document, and through a system of review against which objectives, targets and improvements must be measured, reviewed by top management, and achieved.

To this end, this document has been produced with the full authority of the undersigned, the systems and procedures detailed herein being mandatory for all personnel within the Company.

It is expected that conformance to BS EN ISO 14001 : 2015 against which these documents have been prepared, will satisfy our customers in terms of commitment to the environment, and that they will be pleased to note the formal rationalisation of BS EN ISO 14001 activities.

The Organisation are pleased to take this initiative and this environmental policy is available for all who should wish to see it. It is communicated to the Organisations' Employees and is available for public scrutiny.

The Policy will be reviewed annually, as a minimum, to ensure ongoing suitability and relevance. This will be evidenced in the minutes of the Management Review.
